 **LinkedIn:** <https://www.linkedin.com/in/dario-carretta-180195222/> 📍 Pavia, Lombardy, Italy

Artificial Intelligence MSc student with practical experience developing Machine Learning (ML) and Deep Learning (DL) models to solve real-world problems.

Mainly specialized in neural networks for Computer Vision, but also experienced in other domains, like Natural Language Processing (NLP), Time Series and Signal Processing with focus on the healthcare and environmental domains. Proficient in Python and Deep Learning frameworks, primarily PyTorch, with experience in end-to-end model development from data preprocessing to validation.

Strong foundations in Mathematics, Statistics and theoretical aspects of ML and DL from an academic background.

RESEARCH INTERESTS

Computer Vision, Explainable AI (XAI), Efficient AI, Interdisciplinary AI (Applications to Healthcare and Environment), Deep Fake Detection

WORK EXPERIENCE

Intern at “Remote Sensing and Natural Resources Modelling” Unit **Mar 2026 - Aug 2026**

Luxembourg Institute of Science and Technology (LIST)
Esch-Sur-Alzette, Luxembourg

Working within the Remote Sensing and Natural Resources Modelling unit to perform clustering of Synthetic Aperture Radar time-series, for rice paddy field phenological phase detection.

Deep Learning Researcher Intern **Mar 2024 - Jun 2024**

IRCCS “Casimiro Mondino” Neurological Institute
Pavia, Italy

Developed a Deep Learning model (specifically, a GAN) for the reconstruction of MRI images, to accelerate sequence acquisition times of up to 70%. Worked on all levels of data preprocessing and model development/training, helping in data management, image processing and model design.

EDUCATION

Space Challenges Summer Bootcamp 2025

Jul 2025 - Aug 2025

EnduroSat
Sofia, Bulgaria

Graduated successfully (final score 84.2%).

Intensive one-month summer bootcamp organized by EnduroSat on topics regarding space science and engineering, remote sensing and AI, including lectures by industry experts and workshops. I worked in a team to develop a Deep Learning model to predict fire-risk heatmaps from Sentinel-2 optical satellite images.

EDUCATION (CONTINUED)

Master of Science in Artificial Intelligence for Science and Technology
([link to the course page](#))

Sep 2024 - Sep 2026
(expected)

**University of Milano - Bicocca, University of Pavia, University of Milano - Statale
Milan, Italy - Pavia, Italy**

Exam grades average: 29.73/30

Advanced AI-related subjects, both theoretical and practical.

Followed courses on AI applied to the environmental (especially Earth Observation and Remote Sensing) and industrial domains, together with broader topics about advanced AI techniques, explainability and ethics.

Thesis supervisor: Prof. Fabio Dell'Acqua.

Bachelor of Science in Artificial Intelligence
([link to the course page](#))

Sep 2021 - Jul 2024

**University of Pavia, University of Milano - Statale, University of Milano - Bicocca
Pavia, Italy - Milan, Italy**

Final grade: 110/110 cum Laude

The course focused on contents regarding theoretical bases and techniques of Artificial Intelligence, going also in depth into the applications. In particular, during the third year I followed courses that focused on the application of AI in healthcare.

Thesis title “*Quantitative MRI Reconstruction Using Generative Adversarial Networks: an Application to Neuromuscular Diseases*”.

Thesis supervisor: Prof. Alessandro Lascialfari..

TECHNICAL SKILLS

Python, PyTorch, TensorFlow, Keras, Scikit-learn, SQL, Data Analysis, Computer Vision, Machine Learning, Deep Learning, Git, Linux

LANGUAGES & CERTIFICATIONS

- **Italian**
 - Mother tongue
- **English**
 - Advanced knowledge
 - *Cambridge First Certificate in English (FCE) - C1* (Score obtained: 187/190)
- **French**
 - Basic knowledge
